PROJECTS

Skill Exchange Platform

06/2026 - Present

SCRIET

- Tech: React.js, Node.js, Express.js, MongoDB
- Developed a full-stack web application that enables users to connect locally and exchange skills through peer-to-peer learning.
- Implemented secure user authentication and authorization using JWT and bcrypt.
- Built RESTful APIs for user profiles, skill-based search, connection requests, and learning session management.
- Integrated MongoDB to manage user profiles, skills, connections, sessions, reviews, and notifications.
- Implemented real-time chat functionality using Socket.IO to facilitate communication between connected users.
- Developed features for session scheduling, user reviews, and email notifications to support collaborative learning.
- Applied security practices including input validation, rate limiting, and role-based access control.

Online Voting System | Academic Project

07/2025 - 12/2025

SCRIET

- Tech: HTML, CSS JavaScript, Node.js, Express.js, MySQL
- Developed a web-based voting application that enables users to register, log in, and cast votes in online elections.
- Implemented RESTful APIs using Node.js and Express.js for user authentication, election management, candidate management, and vote casting.
- Integrated MySQL to store and manage users, elections, candidates, and voting records using relational database concepts and foreign key constraints.
- Implemented JWT-based authentication and password hashing using bcrypt for secure user access.
- Designed vote validation logic to prevent duplicate voting and ensure candidates belong to the selected election.
